

Sapici announces price increase for TDI derivatives worldwide.

26-03-2018

Effective March 27, 2018 or as contracts allow, Sapici will increase the price of TDI derivatives.

The increase will range between 10 to 15%.

The following products are impacted by the increase:

- Polurene:
 - TDI Adducts and Isocyanurates
 - TDI – HDI Isocyanurates
- Polurgreen:
 - Very low Monomer TDI Derivates

This action is adopted in order to counteract the substantial TDI price increase, which Sapici is facing for the past several months.
