SAPICI Announces allocation on HDI and IPDI derivatives worldwide

Effective January 15, 2021, SAPICI informs all its customer on the allocation of HDI and IPDI derivatives. The reason is direct consequence of the global extreme tensions on the main raw materials (HDI and IPDI monomer).

The following products are impacted by the allocation:

Hydrene AWI
Hydrene AWI 0I
Hydrene AW 4
Hydrene AW 4 0I
Hydrene AW 5 0I
Hydrene AW 6 0I
Polurene M75 (MPAX/BA/MPA)
Polurene MT 100 100 LLV
Polurene MT 100 LV
Polurene MT 100
Polurene MT90
Polurene MT75
Polurene OK K
Polurene OKD
Polurene OKD EA
Polurene OKDS
Polurene OKHP
Polurene T70
Polurene T70 EA
Polurgreen MT 100 LLV 0I
Polurgreen MT 100 LV0I
Polurgreen MT100 0I
Polurgreen MT 75 0I
Polurgreen MT90 0I
Polurgreen OK 0I
Polurgreen OK 0I K
Ucoflex 630 IB
Unidur E 100I RN

This action is adopted in order to inform you about the sudden and unexpected crisis on these important raw materials.

SAPICI Sales team will do its best to keep you informed about any improvement.
